SUMMARY

Full-Stack Developer with 5 years of experience building dynamic, scalable web applications and translating complex requirements into intuitive user interfaces. Key achievement: engineered high-performance architectures and intelligent AI-driven features, leading to consistent 20-25% improvements in user engagement and page load metrics across multiple projects.

SKILLS

Languages: Node.js, Express, Golang, JavaScript, TypeScript, SQL, C#
Technologies: React, Next.js, Redux, TailwindCSS, Docker, .NET, Jest, OpenAi
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Tools: Git/GitHub, Postman, Swagger UI, Jira
Cloud Platforms: Render, Heroku, Vercel
Soft Skills: Leadership, Communication, Teamwork, Problem-Solving, Code Ownership.

WORK EXPERIENCE

Validds

Remote

Frontend Developer - Contract

02/2026 - Present

- Led the end-to-end frontend architecture of ValidDs using Next.js 16 (App Router), React 19, and TypeScript, delivering a high-performance, fully responsive e-commerce validation platform that reduced initial page load times by 40%.
- Built an interactive product discovery feed and side-by-side comparison tool, streamlining product research for e-commerce sellers and increasing user engagement by 65%.
- Integrated full-scale Stripe subscription billing and Shopify store syncing, implementing tiered plan access and conversion pipelines that improved trial-to-paid conversion rates by 28%.
- Engineered an internal role-gated Executive Management Dashboard using TanStack React Query and Recharts to monitor live recurring revenue (MRR) and customer churn, providing actionable insights that improved executive decision-making speed by 35%.

Seedspike

Remote

Full-Stack Developer

10/2024 - 09/2025

- Led the end-to-end development of FeedMe, a subscription-based web app built with Next.js 14 and Node.js, improving user engagement by 25% through a highly responsive UI and modern architecture.
- Implemented code splitting, lazy loading, and image optimization, reducing initial page load by 15% and improving Lighthouse performance scores by 20%.
- Integrated OpenAI API to power personalized content generation and recommendations.
- Collaborated cross-functionally with design and backend teams to ensure mobile responsiveness, accessibility, and code scalability.

Fobework

Remote

Full-Stack Developer

04/2024 - 10/2024

- Played a key role in the development of a booking house website, implementing both front-end and back-end solutions using Next.js to deliver a fast, dynamic, and responsive user experience.
- Built APIs to generate and manage dynamic portfolio templates, enabling real-time user updates.
- Enhanced website speed by optimizing database queries and reducing response time by 30%, ensuring smooth, real-time interactions for users.
- Collaborated with cross-functional teams, including UI/UX designers and QA engineers, to ensure high-quality and responsive design across all devices.

Ubeets

Remote

Frontend Developer

01/2023 - 12/2023

- Developed and maintained the front-end of the Ibrolink website, which provides services such as electricity, cable TV, airtime and cheap internet data in Nigeria.
- Improved the website's performance by optimizing the code, reducing the page load time by 20% and improving Google Lighthouse score by 30%.
- Collaborated with the back-end developers and the QA team to ensure the functionality and quality of the website.

Pertinence Group

Lagos, NG

Frontend Developer - Intern

09/2021- 12/2021

- Supported the maintenance and development of 8 corporate websites while implementing technical solutions for 5 new web pages.
- Translated designer wireframes into functional, user-friendly interfaces.
- Collaborated in an Agile team environment, contributing to testing, peer programming, and continuous improvements.

PROJECTS

[Quizard](#)

Next.js, TypeScript, Prisma,

PostgreSQL

- Developed a dynamic web-based quiz application allowing users to generate custom quiz questions based on their choice of topic and difficulty level.
- Built the back-end using PostgreSQL to manage user data, quiz results, and question generation.
- Ensured smooth front-end development using Next.js and TypeScript for an optimized, user-friendly experience.
- Focused on responsive design with TailwindCSS to ensure seamless use on both desktop and mobile devices.
- Deployed the project with a focus on performance and scalability, enabling high traffic and real-time data interaction.

EDUCATION

B.Sc in Mathematics (2018 - 2022)

Bowen University
